Gonzalez Utilities has one 125KW, 120/240 volt, 3 phase, 60 hertz standby rated Natural Gas Generator and 400 amp Automatic Transfer Switch (ATS) for sale. We are installing a larger water well and this Generator will not handle the increased electrical load. The Generator was installed inside a building and it has a weather protective enclosure. It is in excellent condition and has 365 hours of run time. No problems have ever occurred with it. It was run 30 minutes every week by the ATS exerciser program. It was removed from service in April 2018.

If you are interested and want to see it, please call our operator, Russell Bracken at (850)554-6845. Pictures are available upon request. Please pass this information to anyone you know that might have an interest in it.

We are asking \$17,000 for the Generator and ATS.
